WM. GILMORE SIMMS .- This distinguished South Carolinian-the great southern author, poet and novelist—is among the most unfortu-nate men of the day. He lost all his property and sources of income by the disruption of the country, the publishers and the holders of his copy-rights residing in the North. He had fourteen children. Lately he buried nine of them; and a few days ago his house and all of his effects were consumed by fire. Nothing was saved from the general ruin but his ilbrary .- Atlanta (Ga.) Con-

D Blondin has a female rival in the West. M'ile Carolista is performing wonders on the tight-rope in Detroit. She walks with ease and rapidity along a rope stretched from the roof of a five-story building on Dearborn street, to the roof of a four-story block opposite, performing on her passage all the feats for which Blondin is famous, even to standing on her head midway across the rope. It is needless to say that the fair Carolista is clad in male attire.

Mr. Cobden's new pamphiet, "The Three Panics; an Historical Episode," is devoted to a review of the extravagance of the Eaglish government trying to spend more money than France in military and naval defences. Mr. Cobden thinks there is something very puerile in the con-stant English fear of the "secret preparations of

ANOTHER GREAT GUN CAST .- An immense 15 inch gun was cast at the Fort Pitt works on Tues day. It weighs in the rough over 70,000 pounds yet it was cast in less than fourteen minutes-a fact which shows the completeness of the arrangements, and that the men having the work in charge thoroughly understand their business IT It is reported that notwithstanding the Confederate troops had done considerable injury to vegetation in the immediate vicinity of Norfolk, yet Norfolk county would raise an abundant supply for the season. The growth has been un-usual, and the country for many miles presents a beautiful vegetable appearance.

The story that Mr. Schnabel, of Pennsylvania, who was recently released from Fort Lafayette, had gone down to rebeldom and taken command of a regiment, is contradicted by the Freeman's Journal, which says he was in New York on the 4th inst.

IT It is stated that Barney Williams has been offered \$30,000 and his expenses to play seventyfive consecutive nights at the principal cities of California. Declines at present on account of the ill health of Mrs. Williams.

The Maine papers state that eighteen or twenty new ships have been contracted for, to be built on the lower Kennebec, the present summer, and that there are over a dozen vessels in course of construction on the Penobscot. ID A correspondent at Constantinople writes

that an American missionary, the Rev. Mr. Coffing, has been assassinated, while traveling on the route from Adana to Aleppo.

The rates for the Denver Daily (Mountain) News are \$16 a year, if paid in advance \$9 a haif year, if paid in advance. Otherwise it is fifty cents every week.

RMBALMING THE DEAD. DR. HOLMES'S AMERICAN PROCESS,

This process, without the use of poisons, dis-covered thirteen years ato, and practiced since that time in the warmest sections of the since that tirge in the warmest sections of the United States, is sufficient recommendation of itself. This mode of Embalming Dead Bodies is to foreign invention, but purely American, having discovered it myself after years of chemical research. Makey of the residents of this only will remember seven years since the exposition of the body of a child emb timed by me. My process has been tested by a large number of physicians and chemists in the principal cities of the Union, and persons of the highest respectability, who have given their certaheates, which my pamphlet will show. The body of a dog embal mod cieven months since, and exposed to the heat of the past summer, is only iblic exhibition at 303 Penn, avenue, where I have embalmed a large number of officers and privat a soldiers of our army to the entire satisfaction of their surviving relatives and friends.

I will also embalm bodies by Sucquet's French system at \$10 a piece. This process I could have use d since the discovery of my own had it been as 50 ad or better. The French Academy of Science at, its annual sitting held on the 72d of March, 1852, I ablished Sucquet's system to the world, a copy of ablished Sucquet's system to the world, a copy of a child there.
